## VERTICAL MACHINING CENTER

### FEATURES

- Direct drive spindle speed up to 10,000 / 12,000 rpm
- Precision linear guideways on X, Y & Z axes
- Faster tool change time < 2 sec
- Ergonomically designed for easy loading / unloading operations
- Wider column ensures heavy duty machining
- Improved chip & coolant management
- Compact design with larger working area

## Advanced Heat Treatment for Steel

Prediction of local microstructures taking carbon segregation into account

### HIGHLIGHTS OF MAGMAsteel 5.5

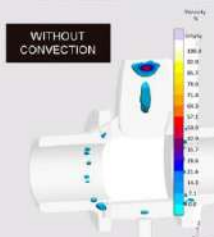

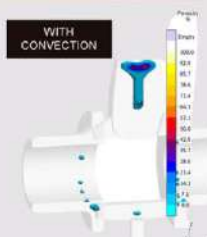

- Prediction of microstructure and material properties for low and high-alloy steel grades
- Consideration of austenitic grain size
- Extension of the limits for alloying elements
- Transfer of segregation results from the casting process into the heat treatment simulation
- New results for microstructure as well as for mechanical properties

### HIGHLIGHTS OF MAGMAiron 5.5

- Convective heat transport during solidification
- The metallurgical state of the melt
- Inoculation effects on precipitated eutectic graphite
- Atmospheric and local metallostatic pressure on feeding flow
- Graphite expansion and austenite shrinkage
- Flow resistance in mushy zones during solidification
- Impact of mold stability on porosity

## Cast Iron in Motion with

Porosity prediction with and without consideration of convection

## Complete System Integration.

## Improve performance and profitability with solutions from the world's fastest-growing OES company

Using a spectrometer (OES) can help organizations make dramatic improvements in quality; from basic alloys like CI/SGI and Brass to the highest-purity metals, stainless steels etc., using the right OES helps firms improve process integrity, reduce rejections and drive dramatic improvements in productivity. All this also comes with significant savings; today, the payback period for a good OES is well under a year!

### **Metavision 10008X**

Low- and sub-ppm analysis for 60+ elements

### **Metavision 1008i**

Low- and single-ppm detection of 55+ elements

### **Metavision 1008i**

Class-leading performance to meet a wide array of needs

### **MOSS**

Lowest cost OES in the world; Ideal for routine applications across

### **Mobile OES**

Powerful, mobile solutions for positive material identification

### **MetaCloud**

Real-time visualization as well as logs, statistics and infographics of analysis results and diagnostic data of your OES on Mobile and Web applications

### **Armour Safe**

The best possible protection

### **Wireless RTDS**

Data transmission at its best with ~1km coverage from OES to the melting platform!

### **CRMs**

Wide range of powder & solid reference materials

### **Sample Preparation Machines**

For in-house preparation of the highest quality of sample surfaces

# Forace Polymers

**Providing Customized Solutions  
by the Largest Producer of Resin,  
Coatings & Foundry Consumables  
in India**

## **Reduce your resin consumption by 30%**

### **High Strength Low Consumption Cold Box, Binder Forcold 700HS**

- ◆ Less resin consumption
- ◆ Low gas defects
- ◆ Cost effective

## **Ultra Low Sulphur Furan Resin**

### **Binder Forfuran 400 HP**

- ◆ Decrease resin & hardener consumption by 10-30%
- ◆ High Reclaimability of Sand
- ◆ Ultra low Sulphur
- ◆ Higher dry strength than regular formulation
- ◆ Excellent rigidity of moulds
- ◆ Excellent collapsibility

## **Reduce Sand Inclusion and Surface Defects**

### **High Performance New Generation Alkaline Phenolic Resin, Binder Fortech 300 HP/ Binder Fortech 300 AC/ Binder Ecotech 777 (Modern Eco- friendly Alphasat (APNB))**

- ◆ High strength at low addition resin percentage
- ◆ Better collapsibility
- ◆ Good hot strength
- ◆ Superior casting finish
- ◆ Free from Nitrogen, Sulphur and Phosphorus
- ◆ Castings are free from Lustrous Carbon and Fining defects
- ◆ Removal of casting defects like sand fusion and metal penetration
- ◆ Environment friendly

## **Convert your coating to powder form**

- ◆ 50% less storage required for powder coating bags
- ◆ Reduction in price due to elimination of buckets
- ◆ No ageing, no shelf life issue
- ◆ Environment friendly

Dear Members of Foundry Fraternity,

Greetings on behalf of Foundries Development Foundation.

Its heartening to know the recognition, support and cooperation from the Members of Foundry Industry for the Maiden Biennial INTERFOUNDRY INTERDIECAST Exhibition 2022 at CODISSIA Tradefair Complex, Coimbatore. This outcome is a tribute to the Will and Wish of a Noble Foundrymen Shri C.R.Swaminathan, whose life is a dedication beyond compare.

Coimbatore being amongst the Largest Foundry Clusters, core objective of INTERFOUNDRY INTERDIECAST Exhibition is to often expose the Hands-on Foundry Professionals and Technicians to the latest Technologies in Manufacture of Metal Castings – both Ferrous and Non-ferrous. This Biennial Event is conceived to be one of its kind for this very purpose.

My sincere appreciations to the Organising Committee and its Extended Members who have contributed to the success of the event. I am confident that they will make this event the most memorable yet for its content and purpose.

C.VELUMANI

President

Foundries Development Foundation

Dear Patrons,

Greetings on behalf of INTERFOUNDRY INTERDIECAST EXHIBITION Committee.

Event of this magnitude is possible only by significant contribution from every Member of the Industry. Though known, its important to mention that first of its kind Biennial Event is after a good understanding of the needs and requirements of Foundry Industry.

Over the Years, I am confident that INTERFOUNDRY INTERDIECAST Exhibition and Allied Conference will grow in stature to become the most anticipated International Event for the Industry. Aim of this Biennial Exhibition is to provide opportunity for all stake holders in the Foundry Industry to understand the Global Best Equipment and Technologies in Design, Manufacture and Supply of Castings.

This Years Maiden Event has attracted all key players in the industry – both Equipment & Input Materials. Trust it will be mutually value adding as both Exhibitors and Foundrymen will have a chance to directly interact from application and usage perspective.

On behalf of the Organising Committee, wishing everyone to have a successful INTERFOUNDRY INTERDIECAST Exhibition.

R.PALANISAMY

Chairman

Interfoundry Interdiecast Exhibitions

Dear Sirs and Madams,

It's a privilege and honour to be part of this all-important event for Stake Holders in Metal Casting Value Chain. INTERFOUNDRY INTERDIECAST Exhibition and Allied Conference is a culmination of efforts to bring the best in the Foundry Sector to the doorsteps of every Foundrymen.

Despite all advancements, key stake holders in the Industry will agree, metal casting is expected to be significant for the Growth of Economies. As much as developments happen across user industries, success will be dependent on parallel growth of Foundry Industry. It was therefore, Senior Members and Mentors to many in the Industry felt a need to organize an event for the benefit of every foundry men – from Entrepreneurs to Shop Floor Executioners. It was clear that the Sectoral requirements are quite Unique and calls for special efforts to expose, educate and empower Foundrymen.

Coimbatore in particular, Tamil Nadu and Southern Region at large, is a home to many Pioneers in the Casting Value Chain. I sincerely believe this Biennial Affair will help bridge not only the Technology Gap but also enhance the value proposition by reducing the Communication and Availability Gaps at the most optimum time and cost. Allied Conference will aide transfer of Skill, Knowledge and Expertise.

My Heartfelt thanks to the untiring efforts of all my Colleagues in the Committee, the unstinted support of Members of Foundries Development Foundation, Exhibitors, Participants and Visitors.

Best Wishes to one and all.

Dr.Nithyanandan Devaraaj  
Co-Chairman  
Interfoundry Interdiecast Exhibition

Fellow Foundrymen,

INTERFOUNDRY INTERDIECAST Exhibition and Allied Conference are both Personal and Professional to me as a Member of the Industry. Accrued benefits to the Industry need not be overemphasized as we are in the cusp of constant changes.

There is need to be Globally Competitive, in terms of Quality, Cost and Productivity. It is important for our people to understand the World's Best & Modern Practices. This will necessarily include Equipment, Technology and Materials which will improve every Foundry Process – from Design to Delivery. Possibilities of automation are known, but adoption rate is to be enhanced. If this is to happen, each and every employee in the Casting Value Chain should be able to visualize the benefits.

I sincerely believe that the Biennial INTERFOUNDRY INTERDIECAST Exhibition and Allied Conference will address these specific needs every two years, the time line for conceptual changes in any industry.

It is my bounden duty to thank Exhibition Committee, Members of FDF, Exhibitors, Participants and Visitors for their support in making this event a most successful one. Yet, together looking forward to scaling greater heights in the coming editions.

R.SARAVANAN

Secretary

Foundries Development Foundation

Greetings from VA Exhibitions!!

We are very grateful to the Foundries Development Foundation (FDF) for considering us to be part of one of its initiative of organizing a biennial international standard trade fair catering to the needs of ferrous and non-ferrous foundry industry in the industrial town of Coimbatore. The maiden edition of Inter Foundry, international exhibition and conference for ferrous and non-ferrous foundry industry will open its doors for all the stakeholders of the foundry industry to engage, network and conduct business with focus on future foundry technologies, modern equipment, automation and IOT, end to end metal casting design, simulation, testing and validation solutions and improved material and chemical suppliers.

We express our sincere thanks to the Aluminium Coimbatore group for extending their support in organizing Inter DieCast, international exhibition on die casting technology, supplies and products as concurrent trade fair to Inter Foundry. We also express our sincere thanks to all the members of the Organizing Committee of Inter Foundry & Inter DieCast for their support and guidance.

We welcome the decision makers and also hands on foundry professionals to witness the best of technologies, solutions and supplies on display by over 180 Indian, foreign and multinational companies spread over an exhibition area of 9,000 sq. mt. at Inter Foundry & Inter DieCast 2022.

Wishing all the exhibitors & visitors, a fruitful and memorable trade fair experience during September 15 – 17, 2022 at Codissia Trade Fair Complex, Coimbatore.

With best regards,

Vamshidhar Gurram  
Director  
VA Exhibitions Pvt. Ltd.

Founded in 2013, Indofen Furnaces LLP is a premium industrial equipment manufacturer for Aluminium Foundry, Recycling & Heat treatment. Since 2019, Indofen has been in a partnership with Industrial Furnaces Insertec S.L.U based in Spain. Insertec is one of the world's leading manufacturers of aluminium furnaces and recycling plants. With this strategic partnership to share technology, engineering & manufacturing, Indofen and Insertec are successfully serving clients around the world including in Oman, South Africa and Mexico. For Aluminium Die Casting industry, Indofen offers energy-efficient and affordable solutions including Tower melting furnaces, Top heated holding furnaces, Crucible furnaces, Transfer ladles, Transfer Ladle Preheaters and T6 Heat Treatment furnaces. For Aluminium Recycling, Indofen offers complete turn-key solutions including scrap treatment line, Reverberatory furnace, Tilting rotary Furnace, casting machines, Pollution control systems, chips melting furnaces etc. Indofen had grown into a trusted & successful brand both in India and International market. Today, Indofen is operating at four state-of-the-art manufacturing facilities including one in Sharjah, UAE. With a team of over 50 dynamic professionals and strategic partnerships both domestic and worldwide, Indofen has risen to being India's leading supplier of premium equipment for the Industrial Heating Sector.

UNITED KINGDOM  
Tel: +91-9881145993  
E-mail: ashwin.katke@liancotechnologies.com  
URL: www.liancotechnologies.com

Lianco Technologies Ltd. offers multiple solutions for the automatic grinding of cast iron, steel and light alloy castings aligned to the needs of each individual customer while addressing needs of Automotive OR Jobbing Foundry challenges. The combination of the 3 linear axes, the rotary axis B and the ability to angle the tool offers the user a full 5 axis machine that guarantees the best finishing of the castings. The tilting table is a controlled axis managed directly by the CNC system of the machine, therefore able to work at any required degree and to interpolate with other axis if required. The machine configuration comes as standard with two tools on the same spindle and as an option with single tool and automatic tool change whenever high flexibility is needed. Looking forward to see you to discuss the process on right approach for selection of Equipment.

NowPurchase is a Kolkata-based technology-driven procurement solution for metal manufacturers that suggests and delivers production inputs with the lowest cost of manufacturing. We provide transparent and efficient procurement for foundries by reducing risk, optimizing cost, and improving the procurement process with the help of their technology and domain expertise. Simultaneously, we are developing the OS (Operating System) that will supercharge the productivity and processes of foundries, eventually allowing procurement to be autonomous. NowPurchase addresses the most pressing issue of time constraints by enabling users to utilize WhatsApp bots for product information, pricing, and order delivery at their leisure. NowPurchase has worked with 100 foundries in the last two years, including large corporations such as TATA Metallica. With its complete range of services and solutions, the company aspires to expand its geographic reach and become the ultimate procurement platform for all metal manufacturers.

E-mail: sales@sreesakthiindia.com

URL: www.sreesakthiindia.com

**M/s. Sree Sakthi Group of Companies** started in eighties, having head office and works at Karamadai a suburb of Coimbatore, approximately 25 Kilometers from Coimbatore. Started in a very small way today it has become a very leading and trusted name in the foundry industry, having very wide customers' base. Since the foundry industries are growing, the need is felt in technology improvements, we have diversified into series of latest and compact Equipments, which in turn resulted in reduction of manpower and increased output of castings.

We are specialized in

1. Hpml Flaskless lines from M/S.Tokyu Co., Ltd., Japan, a unit of Toyota
2. Hpml Flask lines from Belloi and Romagnoli S.r.l, Italy
3. Green Sand – Jolt Squeeze Fully Automatic Lines
4. No bake – Reclamation Plant and Fully Automatic Line
5. Auto pouring Machines [Smart Pour]
6. Online Sand Tester [Smart Lab]
7. High Pressure Moulding Machines [Smart Mould]
8. Homogenize Sand Coolers [Smart Cooler]
9. Auto Fettling Machine
10. All other Foundry Equipments and Accessories

The Motto of M/s. Sree Sakthi Group of Companies is to work for perfection and constantly progress technologically and serve the foundries with its high effective work and excellent products. Its main goal is to serve the Customers and to satisfy their requirement. In short "Customer Satisfaction is our reputation".

## REDUCE YOUR FETTLING COSTS DRASTICALLY! INCREASE YOUR PRODUCTIVITY! BY USING OUR CERAMIC BREAKER CORES!

### >>> Why Ceramic Breaker Cores? >>>

1. Cost and Time savings in fettling which results in **higher throughput and productivity**
2. Saving in metal material loss, labour costs and consumables due to **absence of Gas Cutting, Gouging and Welding**
3. **No sand fusion** around riser neck
4. **Reduction in heat treatment costs** as risers are hammered off prior to it
5. No fear of cutting cracks (which may be observed due to heat generation) which are generally seen in Manganese Steel castings since **Gas Cutting and Weld Cutting are avoided**
6. **Reduction in rejection** due to neck shrinkage
7. **Freedom from the main bottleneck problem of Fettling process** which takes majority of the time
8. Reduce the time a casting is in the foundry from weeks to days and **reduce the time from production to billing cycle**
9. These can be used in **Stainless Steels, Steel, HRCS, High Chrome, Manganese Steel, SG Iron Castings** and almost all other Casting varieties.

We manufacture a large range of sizes of ceramic breaker cores to suit you as per your casting and the riser size. We also tailor-make them as per your customized requirements.

Above image shows the range of ceramic breaker cores we manufacture

### >>> We also trade in scrap metals such as >>>

- Heat Resistant Steel Scrap (HK, HH, Grade 9,7, etc)
- SS Scrap (304, 310, 316, 410, etc)
- Duplex Steel Scrap (2205, 2507, etc)
- Pure Moly, Tungsten, Tungsten Alloy Scrap
- High Nickel Alloy Scrap (Nichrome, Hastalloy, etc)
- Inconel/Incoloy Scraps
- High Chrome Steel Scrap
- Manganese Steel Scrap

**AUM METALS & TECHNO-CERAMICS PVT LTD**

**Manufacturers of Industrial Ceramics and Traders of Metal Scraps**

# Gostol TST India - One of India's leading Shot Blasting Machine manufacturer

**T**he company is an OEM, known for its robust design of machines and world class manufacturing practices.

Moreover, the level of customisation it offers in the shot blasting machine gives it an edge over its competitors. The customisation is made possible using insight gained from different applications across variety of sectors over 7 decades, with more than 4000 Installation.

The machine housing is protected with wear-resistant manganese steel or completely made from manganese steel with extra protection on most exposed plates in case of automatic machines. Manual blasting room buildings will be lined with wear resistant rubber lining for protection. Attention is also given to all other details like dust collection, abrasive recovery, automation and also into every detail of surface preparation, assembly, training etc. The machines are reliable, with very long shelf life and low maintenance costs. As a result, what you get is the best quality machine compared to any other manufacturer in India and round the clock assistance with a 24 x 7 service and spares back up.

The company is in joint venture with Gostol TST of Slovenia since 2015 and since then it has been providing the best quality Shot Blasting Machines all over India to different sectors. The manufacturing facility for Gostol in India caters the Indian, South and Middle East Asian market.

The sales and service branches of Gostol TST India are located at strategic places all over India for quick customer access. Gostol TST has its own development, engineering, production and service department, which allows them to respond to the customer's needs in a more flexible and adjustable manner.

Tumble Blast Machine with Rubber Belt.

## OUR PRODUCT RANGES :

- High alumina & LC castables
- Imported Quartzite boron oxide
- All size fire bricks
- Bentonite
- Ceramic blanket
- Mica folium
- Ceramic paper & board
- Fire clay / Iron oxide
- Coal Dust
- Zircon Sand
- Graphite powder & granules
- Chromite sand
- Cpc & shell coke
- Refractory sleeve
- Ceramic foam filter
- Asbestos mill board sheet
- Mineral wool
- Plumbaco Powder
- Perlite ore (Slag Powder)
- Casting flux
- Copper scrap

Coimbatore, India

Supported by

# Multi-Tracks for Foundries

Electrotherm's Multi-Track System is the most versatile Induction Furnace for foundry application. The Multi-Track Power Supply Units with advance Digital Technology and Intelligent Smart Controller to connect multiple furnaces for batch melting have numerous special attributes, viz. remote diagnosis facility, fiber optic isolation for noise-free control of inverter, robust and most reliable power supply. Digital control using embedded technology with active energy control algorithm ensures highest energy efficiency of the system. Multi-Track System allows simultaneous sharing of power among multiple furnaces in any ratio within the rated power. Infinite power sharing features has the potential to increase the KVA utilization index to almost 100%. User friendly, programmable auto-sintering cycle, energy monitoring and data logging system are some of the added features. System also has provision on HMI to configure any furnace as master furnace and other furnace(s) as follower during power sharing operation of Multi-Track.

*At the service of foundrymen, driven by innovation*
